Your Project Reference

Installation Country (for this project)

What is the footprint size available for a UV conveyor system

What are the dimensions of the items?

What type of items pass through the tunnel?

What type of UV curable product are you using? (i.e. an ink, varnish, coating, adhesive, lacquer)

In order to determine a UV specification we need to know the UV dosage requirement. We therefore need you either to provide us the UV dosage required (mJ/cm^2) or the specific product name, and a product data sheet for the UV curable product that you are using. The supplier of this product can provide this. **Without the UV dosage information, we cannot make a recommendation.**

The UV dosage (mJ/cm^2) required is

The specific UV curable product name is

We can produce either UV, LED, conventional UV + LED or UVC (254nm) + LED solutions. Please tell us your preference & specify if you require doped lamps, or if LED - the specific wavelength required

The minimum conveyor height (mm) required is

The minimum conveyor speed (m/min) is

Please provide any additional information relevant to your requirements, or specify any additional features such as ozone free lamps, digital belt speed indicator, inclined material deposit, belt stoppage control, alternative colour (RAL) or motorized tunnel height

Thank you for completing the form. Please send this back to either to the salesperson you have initially been in contact with, or to info@uv-technik.co.uk.
