

Teflon lamp connector 4 pin with cable

technical data

| | |
|--------------------------------|--|
| name | 4 pin connector with 120mm Cu-cable Ni-plated |
| article number | 471 00900 0000 |
| size (∅ x length) | 18 x 16 mm |
| connector material | Teflon |
| cable | Ni wire (blue/white), Teflon isolated, cross section 1 mm ² |
| temperature | 200°C max. |
| rated operating voltage | 600 V, ignition voltage up to 1500 V |
| wattage | 660 W max. |
| application | for all UVI, UVX, UVN, TUV, including Ozone generating lamps |

application

The socket can be used for all kinds of low pressure lamps (Standard, High Output, Amalgam, Ozone generating lamps) with standard 4 pin base. It is designed to withstand UVC radiation, high temperatures and Ozone.

Please use in try, dust free and noncorrosive environment only.

Please send us a request if you need prefabricated cables. We assume no liability for non intended use.
