

UV sensor SUV 32

- sensor for monitoring irradiance in UV systems
- 1.4404 stainless steel housing
- pressure tight front window
- adaptable to different requirements by means of options
- variants of this type available for special applications (e.g. ATEX)

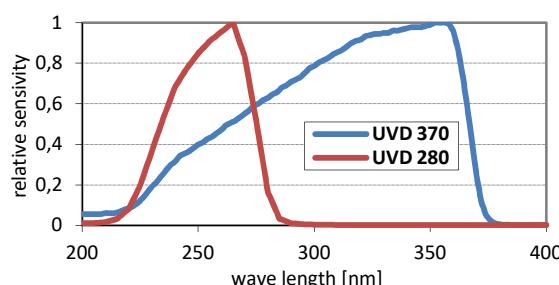

Technical data

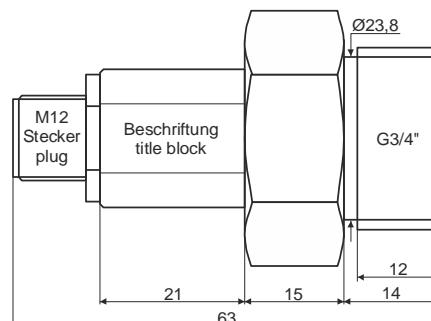

Marking		sensor type, calibration value in W/m ² (in case of integrated electronic), serial number (optional additional customized labeling)
Geometry		sensor body Ø20 mm, wrench size 32 mm, G3/4" screw in thread (see sketch)
UV entrance window		UV transparent quartz glass Ø 8.0 mm
Screw-in torque		max. 20 Nm
Compressive strength		up to 16 bar overpressure
Ambient temperature		operating temperature: 0...60°C, storage temperature: -40...70°C (in dry condition)
Configuration	Option	Description
Housing	1.4404	standard (optional 1.4462 salt water resistant)
Entrance window	A1	UV transparent quartz glass window, flare angle 40° (see graphic directional sensitivity)
UV diode	- B	standard: UVD370: 220...370 nm (see graphic spectral sensitivity) optional: UVD280, selectivity 220...280 nm (see graphic spectral sensitivity)
Connection	C CF	plug M12 (standard for all types) socket M12 (standard for all digital and digital/analog types)
Damping	D	integrated damping element (recommended for medium pressure applications)
Output	- Y1 (T) Y2 Y3 (T) Z4 Z4 Y1 Z4 Y2	diode (short sensor body – without internal electronic, see sketch) voltage output 0 – 4.5 V DC (optional temperature output) current output 4 – 20 mA, current loop, two wire circuit voltage output 0 – 10 V DC (optional temperature output) digital sensor with RS485 Modbus RTU communication (output UV und temperature value) digital sensor with voltage output 0 – 4.5 V DC (calibratable via KUV) digital sensor with current output 4 – 20 mA, current loop, two wire circuit (calibratable via KUV)
Calibration values	ND MD	calibration in front of low pressure lamp with 50, 100 W/m ² (other values possible in consultation) calibration in front of medium pressure lamp with 1000 W/m ² (other values possible in consultation)

Separate product information sheets are available for the appropriate monitors and connection cables.
